

Introducing

# QUADRANT

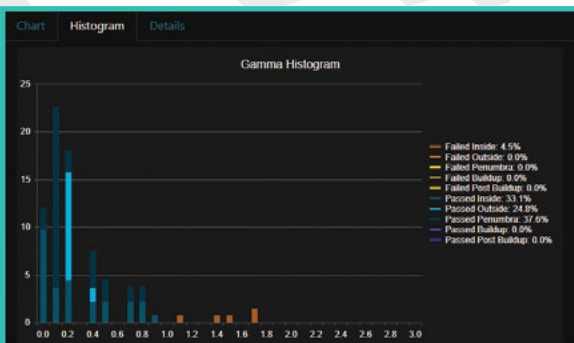

**QUADRANT** is a Cloud Based software platform utilizing a single database for all Machine and TPS Quality Assurance that always references back to the Commissioning Data baselines. Make your QA AAPM compliant with a single cloud-based solution.

## SAFETY THROUGH TECHNOLOGY

- *Direct TPS Absolute Dose Comparison to Measured data. (AAPM TG-53)*
- *TPS Model Analytics (AAPM TG 106)*
- *AAPM TG 142 Dosimetry*
- *Large Database of Commissioning Data for comparison to Industry Standards*
- *Complex Analysis: Know where and how failures occur*

## EFFICIENCY

- *Analysis at a Glance*
- *Equipment Calibration Tracking*
- *Cloud-based data allows customers access to their data immediately*

15	Phot...	100	100	300	STD	CRO	45	96.5...	Rel	
15	Phot...	100	100	300	STD	CRO	60	94.7...	Rel	

## REPORTING TOOLS

- *User Defined data filters*
- *Ready to print reports with multiple templates*
- *Multiple Linac data comparison*
- *Gamma Comparisons*
- *Flatness & Symmetry*
- *TG 51 Parameters*
- *Constancy checks*
- *Scan data in multiple formats*
